Detailed answer key

INSIGHT ADVANCED / END OF COURSE / VERSION A

Complete companion to the current online end-of-year test. Intended answers follow the course-test template. The detailed notes explain grammar, vocabulary, reading evidence and the distinctions between listening options.

Section	Answers in question order	Marks

Listening 2	1 B 2 C 3 C 4 A 5 B 6 A	6
TOTAL	Grammar 20 + Vocabulary 24 + Reading 12 + Listening 12	68

Marking. One mark per numbered question; no negative marking. Main paper: **56 marks in 70 minutes**. Listening: **12 marks**, taken separately. Overall: **68**. Percentage = score / 68 x 100. An asterisk identifies an item with a fair-marking note.

Print correction. Reading 1, question 3 now offers **The quality of the exhibits** as option C. The online option says **number**, which the text does not establish. The intended letter remains C. **Fair marking:** Grammar 10 and Vocabulary 2, question 3 have defensible alternatives; see the detailed notes.

Printing. Use A4 at 100% / actual size. For double-sided student copies, select long-edge binding: article page 8 and questions page 9 then face each other. Keep this key separate from student copies. Main-paper timing excludes Listening.

Grammar

MULTIPLE CHOICE / QUESTIONS 1-10 / STUDENT PAGE 1

01 **B have they experienced**

Initial **rarely** triggers **auxiliary-subject inversion**: **have they experienced**. The main verb keeps its past-participle form in the present perfect.

02 **A for**

Use **for + noun/pronoun + to-infinitive** to identify who would perform the action: **impossible for prisoners to escape**.

03 **B home**

The expression **at home** normally takes **no article** when referring to someone's own home. The alternatives would suggest a particular residential institution or building.

04 **C to have lived**

Claim takes a **to-infinitive**. The **perfect infinitive**, **to have lived**, places the living experience before the claim.

05 **C have been**

Since the start of the week links the past to now. Orders receive the action, so use the **present perfect passive**: **have been delivered**.

06 **B which**

Which introduces a relative clause referring to **the data**. **What** cannot follow an expressed antecedent in this structure; **whom** refers to people.

07 **A only if**

Only if introduces a necessary condition: the discount depends on showing ID. **If only** expresses a wish, and **even if** would remove that condition.

08 **B just as**

Just as means exactly in the way that. The sentence says events match the original plan, rather than merely seeming to do so.

09 **C must**

Must + infinitive gives the intended strong present deduction from the snowy photograph. **Might** would express only possibility, rather than the confidence intended by the key.

10 **B them to attend**

Urge + object + to-infinitive gives the stored answer B. **Fair marking:** A is also standard: **urge that they attend** uses a mandative subjunctive. Accept A or B in classroom marking.

Grammar

MULTIPLE CHOICE / QUESTIONS 11-20 / STUDENT PAGE 2

11 **A if**

If introduces an indirect yes/no question after **I wonder**. The clause keeps statement word order: **they will be able**.

12 **A hired**

Hired within the last six months is a reduced passive relative clause: staff **who were hired**. The staff receive the hiring action.

13 **C got**

Get + past participle forms a passive: **got hacked**. The other options either add an unnecessary object or omit the auxiliary needed for a passive construction.

14 **A will have worked**

The **future perfect simple** measures completed duration up to a future point: by retirement next year, the employment period will total 30 years.

15 **B hadn’t eaten**

This **mixed conditional** links an unreal past cause to a present result. Use the **past perfect** for yesterday's eating and **wouldn't be feeling** for now.

16 **C were bound to win**

Be bound to expresses strong expectation or apparent certainty. Having the best team supports that prediction. **Due to** would suggest a schedule or expected timing.

17 **A turning off**

Try + -ing suggests testing a possible solution. Turning off the video is proposed as an experiment to improve the call, rather than a difficult action to attempt.

18 **B would**

Would + infinitive describes repeated past behaviour. **In the old days** establishes the past time frame; it is not a present habit.

19 **C it was**

The **it-cleft** pattern is **it was ... that...**. It highlights the moment she stepped outside as the point when she noticed the heat.

20 **A needn’t have**

Needn't have means an action happened but was unnecessary. **Arranged Arabic lessons** is understood after **have**; her earlier study made the arrangement unnecessary.

Vocabulary 1

WORD FORMATION / QUESTIONS 1-6 / STUDENT PAGE 3

01 **intellectual**

Anjali is very **intellectual**; she's keen on highbrow places and activities.

Intellectual is the adjective describing an interest in serious ideas and activities. It follows **very**; **intellect** itself is a noun.

02 **catchy**

I've been singing that **catchy** song from the supermarket advert all day.

A **catchy** song is easy to remember and tends to stay in the listener's mind. Add **-y** to form the adjective.

03 **anti-Gehry / anti Gehry**

The protesters are very **anti-Gehry** because they hate the design of his new building in the city.

The prefix **anti-** expresses opposition: the protesters are against Gehry or his design. Accept **anti-Gehry** and **anti Gehry**, as in the online key.

04 **repellent / repelling**

The photographs of the wasted food were **repellent**; I certainly wasn't enchanted by them.

Repellent means causing strong dislike or disgust, contrasting with **enchanted**. **Repelling** is also accepted by the online key; **repellent** is the usual adjective in this context.

05 **discordant**

My brother playing **discordant** notes on the piano sounds awful!

Discordant describes notes that clash or do not sound harmonious. An adjective is needed to modify the plural noun **notes**.

06 **leisurely**

Emily walked at a **leisurely** pace to the park.

Leisurely means unhurried. Despite ending in **-ly**, it functions here as an **adjective** modifying **pace**.

Vocabulary 2

MULTIPLE CHOICE / QUESTIONS 1-9 / STUDENT PAGES 3-4

01 **B sewage system**

A **sewage system** is infrastructure for carrying and dealing with wastewater. It is the option that can be built as a city system; the other phrases refer to a person or a busy street.

02 **A squalid**

Squalid means extremely dirty and unpleasant. The contrast with **cleaner living conditions** supplies the strongest clue.

03 **C resolve**

Resolve differences means settle disagreements, matching the completed solution intended by C. **Fair marking:** B (**tackle**, meaning address) is also grammatically defensible in this stem; accept it in classroom marking.

04 **C assert**

Assert that... means state something firmly as true. It introduces the newspaper's claim about the story's accuracy.

05 **B crisis**

A **fuel crisis** is a serious problem affecting fuel supply or availability. It fits the stated consequence of rapidly rising petrol prices.

06 **A commence**

Commence is a formal verb meaning begin. The event has a scheduled start time; **abolish** means end or remove something.

07 **B imbalance**

An **imbalance between** two things is a lack of appropriate proportion. The sentence compares time devoted to work and leisure.

08 **C a piece of cake**

A piece of cake means very easy. The whole idiom functions as a description after **is**.

09 **B grit**

Grit means courage, determination and persistence. It is a quality someone shows; a **feat** is an achievement rather than that personal quality.

Vocabulary 2

MULTIPLE CHOICE / QUESTIONS 10-18 / STUDENT PAGE 4

10 **A an insistence on**

The noun-preposition pattern is **an insistence on + noun/-ing**. It expresses a firm requirement that students wear uniform.

11 **C par for the course**

Par for the course means normal or to be expected in that situation, often about something undesirable. The next sentence confirms his habitual lateness.

12 **B addiction to**

Addiction to names a very strong dependence or desire. The preposition **to** belongs to this noun pattern.

13 **C out of the blue**

Out of the blue means unexpectedly. The long gap in contact and the explicit reference to surprise support the idiom.

14 **A cube**

An **ice cube** is a small block of ice commonly added to a drink. **Disk** and **arc** name other shapes.

15 **B going down with something**

Go down with something means begin to become ill. The reference to feeling better explains why Max cannot attend school.

16 **A was at my wits' end**

At one's wits' end means extremely worried or unable to think what to do. The speaker cannot decide where to begin looking.

17 **C hexagon**

A **hexagon** is a flat shape with six sides. A pyramid and a cylinder are three-dimensional forms and do not match the card's six-sided outline.

18 **B of advanced years**

Of advanced years is a formal expression meaning elderly. The reference to nearly 100 years of age supplies the meaning.

Reading 1

SHORT TEXTS / QUESTIONS 1-6 / STUDENT PAGES 5-7

Each explanation refers to the matching numbered short text. Where the source wording permits a different interpretation, the note identifies it.

01 B Long-term members of an online service

Text 1, email. References to an existing subscription, continued support and a valued client show that the message addresses established customers. It is not mainly recruiting people who have yet to subscribe or welcoming new members.

02 C To highlight the changing fortunes of a species

Text 2, honey bees. The article describes spread to new regions and changes in the number of recognised species. C best captures that changing distribution and survival. Food production is background context, not an account of financial importance or a general claim about human damage.

03 C The quality of the exhibits

Text 3, gallery review. The writer is disappointed with what is on display. The facilities are dismissed as secondary, and the other gallery's location is contextual. **Print correction:** C now says **quality**, because the original option about the **number** of exhibits was not established by the text.

04 B Their design has been inspired by use.

Text 4, shoe review. The writer stresses research, testing and feedback that have shaped the design. Price and materials are mentioned, but the final emphasis is on development informed by actual use and evaluation.

05 A Disappointed with colleagues

Text 5, lab note. The author criticises pride and colleagues shouting at each other while urging cooperation. That indicates disappointment with their behaviour. The note does not admit the author's own mistakes or celebrate a breakthrough already achieved.

06 C Contact the sender if he receives the order

Text 6, message. Sam is asked to report whether the order arrives. The sender, not Sam, will contact the courier if necessary. The tracker is mentioned as information already checked, not as an app Sam must upload.

Reading 2

ARTICLE MULTIPLE CHOICE / QUESTIONS 1-6 / STUDENT PAGES 8-9

Paragraph numbers refer to the numbers beside the article in the student paper. The byline is not counted as a paragraph.

01 **C Bird flight is more sophisticated.**

Paragraph 2. The writer describes birds' control of flight as superior to machines, explaining how wing shape and body movements work together. That establishes greater sophistication, rather than incomparability or reduced interest.

02 **B Which part of the body is heaviest is vital to comprehending its stability.**

Paragraph 3. Harvey needed to map the properties and distribution of a bird's mass to understand its stability. B best captures the importance of where weight is located. A is a broader claim, and C introduces a proportional relationship not stated.

03 **A They analysed their anatomy to create mathematical models.**

Paragraph 4. The team measured anatomy and represented body tissues as geometric shapes in a modelling program. This is anatomical analysis translated into mathematical models, rather than matching pre-existing models to birds or testing physical replicas.

04 **C Birds redistribute weight to assist flight, whereas a plane cannot.**

Paragraph 5. Birds can change the relationship between their centre of gravity and neutral point through wing positions and body movements; planes have fixed distances. C summarises that contrast. The passage describes complex, rapidly changing flight, not simple patterns.

05 **B Energy conservation and speed were key.**

Paragraph 5. Real-time observation showed that control mattered more than speed or energy efficiency. B identifies the priorities that the observation challenged; A and C do not represent that earlier emphasis accurately.

06 **C To outline how such research shapes engineering**

Paragraph 6. The writer explains how the findings are informing more adaptable drone designs and their possible uses. The purpose is to show research influencing engineering, rather than claim that drones already match birds or focus on passenger-aircraft advances.

Listening 1

SHORT EXTRACTS / QUESTIONS 1-6 / STUDENT PAGE 10

Audio: insight-advanced-end-of-year-test-a-listening-1.mp3 (approximately 5 minutes). Allow **45 seconds** to read this section; play the complete track **twice**, with **10 seconds** between plays. Repeat this procedure separately for each listening section.

The answers reproduce the stored online listening key. These explanations distinguish the answer choices; they are not a transcript or an independent transcription of the audio. Students answer during playback; the online setup has no additional timed answer window.

01 **A Businesses can be profitable as well as socially responsible.**

The keyed main idea is that **profitability and social responsibility can coexist**. B makes a different general claim about sustainability's effects, while C presents environmental concern as necessarily reducing profit.

02 **B There is no reason to live near a good school.**

The key identifies the boy's claim that **living near a good school offers no reason or advantage** as the point the girl rejects. The task asks which claim is corrected, rather than which educational issue is merely discussed.

03 **A She thinks that they are driven by commercial interests.**

The girl's keyed view is that some customs are **driven by commercial interests**. Present-day relevance and exaggerated social importance are different judgements.

04 **C The most critically acclaimed programmes are older.**

The supporting detail selected by the key is that **the most highly praised programmes are older**. Distinguish evidence used for the man's argument from possible claims about formulas or past audience size.

05 **B She believes that there will be too much travel involved.**

The selected reason is **the amount of travel required**. The other alternatives would make the small salary increase or the challenge of the role her main objection.

06 **B The article was unclear in parts.**

The keyed shared view is that **parts of the article were unclear**. This task requires agreement between both speakers; the alternatives concern authorship and seriousness instead.

Listening 2

ANCIENT PEOPLE / QUESTIONS 1-6 / STUDENT PAGE 11

Audio: insight-advanced-end-of-year-test-a-listening-2.mp3 (approximately 4 minutes 24 seconds). Allow **45 seconds** to read this section; play the complete track **twice**, with **10 seconds** between plays. Repeat this procedure separately for each listening section.

The answers reproduce the stored online listening key. These explanations distinguish the answer choices; they are not a transcript or an independent transcription of the audio. Students answer during playback; the online setup has no additional timed answer window.

01 **B It misrepresents them as overly primitive.**

The keyed criticism is that a limited-diet account **makes early humans seem too primitive**. Lack of useful detail and conflict with earlier research are different objections.

02 **C To improve their flavour as ingredients**

The selected purpose of processing the herb mixes is to **improve their taste as ingredients**. This differs from intensifying flavour alone or preserving food for longer.

03 **C To improve their nutritional benefit**

The key identifies **improved nutritional benefit** as the reason for processing vegetables. Complementing meat and making cooking easier are distinct proposed explanations.

04 **A It was most likely dominated by red meat.**

The stored key links the zinc evidence to a diet **dominated by red meat**. The note reports the listening answer; the other options claim similarity to Homo sapiens or mainly vegetable consumption.

05 **B They benefitted from their eating habits.**

The keyed inference is that Homo sapiens **benefited from their eating habits** during the ice age. Rapidly changing those habits or increasing dietary variety would be more specific claims than the selected answer.

06 **A It ensured better resource management.**

The key selects **better resource management** as the conclusion about population spread. Necessary behavioural change and cultural development are different conclusions offered by the distractors.
