END-OF-COURSE TEST / VERSION A

NAME _____ CLASS _____

DATE _____ TOTAL _____ / 68

70 minutes for Grammar, Vocabulary and Reading (56 marks). Listening is taken separately (12 marks). Write your answers on this paper. Circle **A**, **B** or **C** for multiple-choice questions. Each question is worth one mark.

Grammar / Multiple choice

20 marks

01 Rarely _____ a day filled with such happiness.

A they have experienced **B** have they experienced **C** have experienced

02 The authorities claimed it would be impossible _____ prisoners to escape from the new prison.

A for **B** of **C** to

03 In winter, when the weather's really cold, he likes to stay at _____ in the warm reading a book.

A a home **B** home **C** the home

04 He claimed _____ in every country in South America.

A to be living **B** having lived **C** to have lived

05 Over 700 orders _____ delivered since the start of the week.

A are being **B** have **C** have been

06 In phase two, the team will analyse the data _____ it has gathered during the research process.

A what **B** which **C** whom

07 We offer a student discount _____ an official ID card is shown.

A only if **B** if only **C** even if

08 Everything is progressing _____ they originally planned.

A even as **B** just as **C** as if

09 David has sent me a photo of the snow in Japan - it _____ be freezing cold there at the moment.

A can **B** might **C** must

10 We've urged _____ the conference next week.

A that they attend **B** them to attend **C** them to attending

Grammar

MULTIPLE CHOICE / QUESTIONS 11-20

Grammar / Continued

20 marks

Choose the correct answer for each sentence. This section has 20 questions in total.

11 I wonder _____ they will be able to handle the pressure.

A if **B** that **C** what

12 The jobs of staff _____ within the last six months are at risk.

A hired **B** hiring **C** having hired

13 Their website _____ hacked and no one could use it for several days.

A got it **B** had **C** got

14 If she retires next year, she _____ there for 30 years.

A will have worked **B** has been working **C** had worked

15 If he _____ those prawns yesterday, he wouldn't be feeling sick.

A wouldn't eat **B** hadn't eaten **C** didn't eat

16 They _____ because they had the best team - and that's exactly what happened.

A were due to win **B** would have won **C** were bound to win

17 If the quality of the call is bad, try _____ the video.

A turning off **B** to turn off **C** turn off

18 In the old days, people _____ read poetry aloud.

A will **B** would **C** have

19 In fact, _____ only when she stepped out of the house that she realized just how hot it was outside.

A that was **B** what was **C** it was

20 My company arranged Arabic lessons for me, but they _____ as I'd studied Arabic at university.

A needn't have **B** couldn't have **C** mustn't have

Vocabulary

WORD FORMATION & MULTIPLE CHOICE

Vocabulary 1 / Word formation

6 marks

Complete each sentence with the correct form of the word in brackets.

01 Anjali is very _____ (intellect); she's keen on highbrow places and activities.

02 I've been singing that _____ (catch) song from the supermarket advert all day.

03 The protesters are very _____ (Gehry) because they hate the design of his new building in the city.

04 The photographs of the wasted food were _____ (repel); I certainly wasn't enchanted by them.

05 My brother playing _____ (discord) notes on the piano sounds awful!

06 Emily walked at a _____ (leisure) pace to the park.

Vocabulary 2 / Multiple choice

18 marks

Choose the correct answer. Questions 7-18 continue on the next page.

01 The first _____ in the USA was built in Chicago in the 1850s.

A city dweller **B** sewage system **C** congested thoroughfare

02 The charity works to help people move out of _____ housing into cleaner living conditions.

A squalid **B** chaotic **C** abundant

03 The friends were able to _____ their differences by working together to find a solution.

A alleviate **B** tackle **C** resolve

04 The newspaper felt that it had to _____ that the published story was true.

A inflict **B** seize **C** assert

05 The fuel _____ meant that the price of petrol was rising quickly.

A pitfall **B** crisis **C** quick fix

06 The event is scheduled to _____ at 10 a.m. on Thursday.

A commence **B** abolish **C** yield

Vocabulary

MULTIPLE CHOICE / QUESTIONS 7-18

Vocabulary 2 / Continued

18 marks

Choose the correct answer. This section has 18 questions in total.

07 Students are not happy about the _____ between workload and leisure time.

A fatigue **B** imbalance **C** motive

08 Riding a bicycle is _____ once you know how to do it.

A a pinch of salt **B** a grain of truth **C** a piece of cake

09 I admire the _____ Mariam showed climbing the mountain like that.

A preoccupation **B** grit **C** feat

10 There is _____ students having to wear their uniform at school.

A an insistence on **B** a menace to **C** an association with

11 Tom being late for school is _____ for him. He's always late!

A across the board **B** set the bar low **C** par for the course

12 My sister has a real _____ chocolate. She eats it all the time!

A conformity with **B** addiction to **C** restriction on

13 An email from a friend I hadn't spoken to in years arrived _____ - it was a surprise!

A a purple patch **B** red tape **C** out of the blue

14 We like to add an ice _____ to our lemonade when the weather's hot.

A cube **B** disk **C** arc

15 Max is _____, so he can't go to school until he feels better.

A hard of hearing **B** going down with something **C** of limited means

16 I _____ when I lost my laptop. I couldn't think where to start looking for it.

A was at my wits' end **B** spelled the end **C** met an untimely end

17 The birthday card is a _____ shape - each of its six sides has a different picture on it.

A pyramid **B** cylinder **C** hexagon

18 My grandmother is _____ - she's almost 100 years old!

A in reduced circumstances **B** of advanced years **C** underprivileged

Reading 1

SHORT TEXTS / QUESTIONS 1-2 / 6 MARKS IN TOTAL

1. Email

From: OnlineFilmhouse
To: Kate Wallace
Subject: A festive thank you

Dear Subscriber,
What a year it has been! As a valued client, we want to thank you for your continued support. Here at the Online Filmhouse, we work hard to ensure your ongoing enjoyment of great cinema. To celebrate this holiday period, we're offering you a 10% discount code to use on any of our latest releases. Remember, recommend a friend to our service this month and you'll be entitled to two free movies of your choice!

01 Who is the target audience for the email?

A Potential members of an online service

B Long-term members of an online service

C New members of an online service

2. Honey bees

Emma Mitchell

The honey bee is a sociable flying insect originally native to Afro-Eurasia. However, as humans began to use them as a resource providing a valuable foodstuff, distribution has grown. Since the 16th century, multiple subspecies have been introduced to the Americas and the Antipodes. From a historic peak of 11, globally there are currently eight surviving species of honey bee officially recognized - with a total of 43 subspecies. As such, the honey bee represents only a small fraction of the approximately 20,000 known species of bee.

02 What is the purpose of the article about honey bees?

A To describe the financial importance of honey bees

B To explain the negative effect of humans on nature

C To highlight the changing fortunes of a species

Reading 1

SHORT TEXTS / QUESTIONS 3-4 / 6 MARKS IN TOTAL

3. What to see

I had high expectations for this place to be honest, maybe unfairly, but certainly understandably, based on the glowing reviews for the sister gallery in the city. Maybe they manage to attract a bit more diversity in the artists being so central, but to say my visit was a let-down is an understatement. While the cafe and shop, which are yet to fully open, are as usual a distraction from the main event in my opinion, I wish I could speak more glowingly for what there is on display!

03 What does the reviewer feel is problematic about the gallery being reviewed?

A The location of the gallery

B The facilities available

C The quality of the exhibits

4. Best gear of the year

When it comes to trail running, the MudRoc235s are without compare. Yes, there's a substantial but competitive price tag, but that's more than expected given the amount of research and development that has gone into this product. And it's that quality which sets them apart. While boasting a groundbreaking design, and using the most durable of innovative materials, you have to appreciate the hours of analysis and tester feedback that have shaped the multi-award-winning shoe.

04 According to the review, what makes the MudRoc235s so special?

A They are affordable compared to other shoes.

B Their design has been inspired by use.

C The materials that the shoes are made from.

SHORT TEXTS / QUESTIONS 5-6 / 6 MARKS IN TOTAL

5. Lab note

OK, I can see that things didn't quite go as planned in the lab this week, but we really need to put that behind us and try to resolve all the outstanding issues. There's no point letting personal pride get in the way, or becoming annoyed when your expectations come to nothing. I'm sorry to have to say this, but shouting at each other won't help us to make the breakthrough we're so close to achieving. We can overcome this! We just need to keep talking!

05 How does the author of the lab note feel?

A Disappointed with colleagues

B Angry about mistakes they made

C Proud of their achievements

6. Message to Sam

Hi Sam! I was wondering if you had received the order that was dispatched to you on the 25th? The last update on the tracker app says it's still in transit, but as I chose express delivery, it should really have arrived. If you get it in the next couple of days, could you message me and let me know? If not, I'll get in touch with the courier and try to locate its whereabouts!

06 What does the writer want Sam to do?

A Call the courier to trace the order

B Upload the tracker app to check the order

C Contact the sender if he receives the order

Flight patterns

READING 2 / HENRY LEE / 6 MARKS

Read the article, then answer questions 1-6 on the next page.

1 The flight of birds has been observed throughout time, inspiring all manner of fascinating flying machines. Yet until recently, the precise biomechanics which render it possible have been a bit of a mystery.

2 That all changed in a landmark study carried out by Christina Harvey of the University of Michigan. She discovered that the majority of birds have an intriguing set of abilities that allow them to control flight. And they do this in a manner far superior to any machine. Hours of observations revealed that birds manipulate their wing shape, completely altering how air moves over them. Simultaneously, they control their body movements to affect inertia - the force that pushes against them as they tumble through the air.

3 Earlier research into bird flight had mainly focused on stability, the trait that any flying animal requires to avoid flying in the wrong direction. The concept of stability was viewed as having two distinct aspects. The first of these was control - the active ability to alter responses to any disturbance in the air. The second was known as inherent stability. This described how a wing design has a structural resistance to different forces. Harvey realized that to better understand how specific birds were affected by these forces, she needed to map out all the properties of a bird's mass and identify how this was distributed.

4 Her team took detailed measurements of weight, length and wingspan of 22 diverse species. Slowly they began to piece together the range of motion made possible by their physical structure. To better visualize this, they created a modelling program, which represented layers of bone, muscle, skin and feathers as combinations of hundreds of geometric shapes. This software was then used to help them to calculate relevant characteristics, such as the centre of gravity and neutral point - the aerodynamic centre of a bird in flight. They were then able to determine each of these properties for each bird with its wings held in different positions, for example, when flying fast or diving.

5 The finalized models revealed that unlike planes, which have fixed distances between their centre of gravity and the neutral point, birds can vary theirs greatly during flight to achieve desired performance. A bird will constantly switch between stability and instability, creating a complex flight that can change in a matter of seconds. For instance, birds like hawks swoop upwards when landing. This creates a position where the body is almost vertical and the wings are completely outstretched, and allows them to stop precisely where they want. Observing birds flying and landing in real-time, the researchers discovered that their flight is not always determined by speed or energy efficiency. In fact, it is more heavily influenced by control.

6 The discoveries have identified previously unknown factors contributing to birds' aerobatic skills. They also play an important role in informing the design of new aircraft which engineers predict will be potentially as adaptable as birds. No one in a passenger aircraft would want to experience the array of manoeuvres observed in hawks, but Harvey's data has been incorporated into the early stages of drone designs. The goal is to create unmanned aircraft that can display the flexibility and control of a bird in flight. This would give greater scope for drones used in surveillance or search and rescue missions, enabling them to better navigate the skies.

Reading 2

FLIGHT PATTERNS / QUESTIONS 1-6

Choose the correct answer

6 marks

Circle A, B or C. Refer to the article on the previous page.

01 How does the writer describe bird flight and other forms of aviation?

A Bird flight cannot be compared to them.

B Bird flight is less interesting.

C Bird flight is more sophisticated.

02 What did Harvey's research reveal about a bird's weight?

A Their weight impacts on how they react to anything disturbing their flight.

B Which part of the body is heaviest is vital to comprehending its stability.

C A bird's wings are structurally in proportion to their weight.

03 How did the research team come to understand the physical complexity of birds?

A They analysed their anatomy to create mathematical models.

B They built bird models to test using computer software.

C They observed computer models and matched them to birds.

04 How does the writer summarize the results of the computer modelling?

A Bird flight is complex because they are light and unstable.

B Bird flight patterns tend to favour simplicity.

C Birds redistribute weight to assist flight, whereas a plane cannot.

05 What assumption, changed by real-time observation, did the researchers make about bird flight?

A Maintaining constant control at speed was vital.

B Energy conservation and speed were key.

C Speed was not fundamental to success.

06 What is the purpose of the final paragraph?

A To illustrate advances in airplane engineering

B To demonstrate the similarity of birds and drones

C To outline how such research shapes engineering

End of the main paper. Check your answers in Grammar, Vocabulary and Reading before the 70 minutes finish. Wait for your teacher before starting Listening.

Listening 1

SHORT EXTRACTS

NAME _____

Choose the correct answer

6 marks

You have 45 seconds to read the questions. You will hear this recording twice, with a 10-second pause between plays. Circle A, B or C.

01 Listen to an extract from a lecture on business. What is the speaker's main idea?

A Businesses can be profitable as well as socially responsible.

B Business success is often affected by ideas of sustainability.

C Businesses which focus on the environment make less money.

02 Two students are discussing an article about education. Which of the boy's ideas does the girl identify as factually incorrect?

A There is a lot of attention given to exam results.

B There is no reason to live near a good school.

C There are similarities between grades across social groups.

03 Listen to two young people discussing a special occasion. What is the girl's view on some of the customs?

A She thinks that they are driven by commercial interests.

B She thinks that they have a lot of relevance today.

C She thinks that they are given too much social significance.

04 A man is talking about television. What detail is offered to support the speaker's key point?

A The best programmes follow a winning formula.

B The programmes on TV years ago appealed to few people.

C The most critically acclaimed programmes are older.

05 A woman is talking about work. Why is she not interested in the new role?

A She feels that the increase in salary is insignificant.

B She believes that there will be too much travel involved.

C She suggests that she would find it too challenging.

06 Two students are discussing an article. What do they both agree on?

A The article was not written by a person.

B The article was unclear in parts.

C The article was not very serious.

Wait for your teacher before Listening 2.

Listening 2

ANCIENT PEOPLE

NAME _____

Choose the correct answer

6 marks

You have 45 seconds to read the questions. You will hear this recording twice, with a 10-second pause between plays. Circle A, B or C.

01 What is the speaker's opinion of the idea that early humans had a limited diet?

A It lacks sufficient detail to be of use.

B It misrepresents them as overly primitive.

C It conflicts with earlier research.

02 What reason does the speaker give for the herb mixes being processed?

A To increase the strength of their flavour

B To preserve foods for longer

C To improve their flavour as ingredients

03 According to the speaker, why did early humans process vegetables?

A To complement the meat they ate

B To ease the process of cooking

C To improve their nutritional benefit

04 What does the presence of low levels of zinc tell us about the Neanderthal diet?

A It was most likely dominated by red meat.

B It was virtually the same as the Homo sapiens diet.

C It was comprised mainly of vegetables.

05 What does the speaker imply about Homo sapiens during the ice age?

A They rapidly changed their eating habits.

B They benefitted from their eating habits.

C They increased the diversity of their diets.

06 What conclusion does the speaker draw from the way the Homo sapiens population spread?

A It ensured better resource management.

B It necessitated changes in behaviour.

C It stimulated a development of culture.

End of the test.
