06 The two news stories were _____, so I wasn't sure which one to believe.

A interchangeable **B** various **C** contradictory

Working from home or away?

READING H / DIGITAL NOMADS / BY ANDY WHITE / 6 MARKS

Read the article, then answer questions 1-6 on the next page.

1 Once dismissed as 'citizens of nowhere', one sector of the workforce is growing more important to countries who see it as a valuable source of revenue.

2 My stereotypical view of a digital nomad used to be of carefree university-educated western twenty-somethings working on laptops at far-flung beach resorts. However, the era of the digital nomad is entering a new phase. More countries are starting to issue special visas designed to attract long-term remote workers. Drawn by the offer of lower costs of living and broadband speeds equivalent to those back home, a growing number of individuals are choosing to work remotely while overseas. The key advantage to this working life is it offers greater flexibility in terms of both travel and employment. Many digital nomads will work from several different destinations per year, and often take on a variety of contracts to ensure a more diverse workload.

3 But it's not just individuals who are shaping the trend. Many companies have established their own remote working policies to allow for greater flexibility and ensure they retain staff. For employees, a number of remote working days may now be part of their standard contract. This might lack the excitement of embracing the digital nomad life full-time, but it enables both employer and employee greater opportunity to make clear plans. It also provides more job security. Furthermore, businesses can play an integral role in providing clear and up-to-date immigration and tax advice. Both areas that individual digital nomads often find problematic.

4 While the benefit of a guaranteed period of remote working are apparent for the employee, there are a number of advantages for employers. Studies have shown that international travel experience has a positive effect on personal and professional growth. Many people who have taken the opportunity to work abroad feel increased confidence and adaptability. Alongside that they develop skills like cultural sensitivity and communication. Assuming that a business has a simple and efficient remote-working process in place, allowing loyal employees to work abroad may result in them bringing a greater depth of experience and diversity to their role.

5 However, not everyone is as keen on the transition to new working patterns. In many popular destinations, digital nomads are blamed for driving up the cost of rents and impacting on society. Digital nomads tend to earn proportionally more than locals. Therefore, they can afford higher rental costs. Many landlords, keen to take advantage of additional income, are offering properties to outsiders. This limits the availability of affordable housing for established residents. Communities often report an impact on their sense of identity as digital nomads arrive. As huge numbers of residents stay only short term, locals feel that there is a lack of stability and trust in their neighbourhoods. While there may be some economic benefit provided by rents, spending in local shops and supermarkets, many digital natives are given preferential tax arrangements. This means they put additional strain on infrastructure while paying less to maintain it.

6 Despite these issues, the phenomenon of the digital nomad is unlikely to go anywhere soon. What is important is that a balance is found between the host communities and the nomads who arrive. While their ambition may be to get the most they can from their time in the sun, they need to give back to the community which has welcomed them.

Reading

H / DIGITAL NOMADS / QUESTIONS 1-6

Choose the correct answer

6 marks

Circle A, B or C. Refer to the article on the previous page.

01 According to the writer, what kind of people were the first generation of digital nomads?

A Young people with no ties to a particular location

B People who worked in jobs related to technology

C Privileged European or North American graduates

02 What does the writer see as the main benefit of current remote working?

A Freedom to vary the scope and scale of work

B Visas to work abroad are easily accessible

C An opportunity to reduce living expenses

03 What is the writer's view of employers offering periods of remote working in contracts?

A It ties people in to their current role.

B It is a relatively boring proposition.

C It provides a welcome sense of insurance.

04 What assumption does the writer make about employers' views of remote-working opportunities?

A They are eager to encourage participation to build loyalty.

B They are keen to promote and capitalize on any skills developed.

C They are happy to make reference to it to show diversity.

05 What example does the writer provide of the negative impacts of remote working on society?

A Communities become less connected.

B Long-term rent prices increase rapidly.

C Resources are distributed unequally.

06 How would you summarize the writer's opinion of the current situation?

A There is a need to limit the impact of remote working.

B There is a need to address concerns on either side.

C There is a need to promote the benefits to locals.

End of the main paper. Check your answers in Grammar, Vocabulary and Reading before the 70 minutes finish. Wait for your teacher before starting Listening.

Listening

I / PROCRASTINATION

NAME _____

Procrastination

6 marks

You have 45 seconds to read the questions. You will hear the recording twice, with a 10-second pause between plays. Circle A, B or C for each question.

01 What does the speaker imply about procrastination?

A It is a habit that most people unconsciously adopt.

B It is a habit that is common despite obvious drawbacks.

C It is a habit that tends to affect people only short term.

02 According to the speaker, what is our mindset when we submit to present bias?

A We focus favourably on immediate events.

B We favour significant events only.

C We think carefully about consequence.

03 What reason does the speaker give for the tendency to create split selves?

A Most people want to feel a greater sense of freedom.

B Most people find it satisfying to socialize more often.

C Most people choose immediate rather than delayed reward.

04 How does the speaker define a loss aversion bias?

A An anxiety about losing that impacts decision-making
